

ADDITIONAL RESOURCES

In writing this book, I attempted to cover a new space and not rehash the many great books that have been written already. Below, I provide a list of books whose shoulders I stood on:

The Bitcoin Standard, Ammous

Sovereignty Through Mathematics, Svanholm

Bitcoin is Venice, Farrington/Meyers

Atlas Shrugged, Rand

Broken Money, Alden

Mastering Bitcoin, Antonopoulos

Included is also a list of essays that I consider to be seminal to understanding Bitcoin. These essays are available in audible form from Guy Swann's "Bitcoin Audible" podcast:

Only The Strong Survive, Farrington/Larsen

Orange is the New Green, Mogonet
