

5	The Problem of Hume and Mill and the Driving Force of Money	416
6	Cash-Induced and Goods-Induced Changes in Purchasing Power	419
	Inflation and Deflation; Inflationism and Deflationism	
7	Monetary Calculation and Changes in Purchasing Power	424
8	The Anticipation of Expected Changes in Purchasing Power	426
9	The Specific Value of Money	428
10	The Import of the Money Relation	430
11	The Money-Substitutes	432
12	The Limitation on the Issuance of Fiduciary Media	434
	Observations on the Discussions Concerning Free Banking	
13	The Size and Composition of Cash Holdings	448
14	Balances of Payments	450
15	Interlocal Exchange Rates	452
16	Interest Rates and the Money Relation	458
17	Secondary Media of Exchange	462
18	The Inflationist View of History	466
19	The Gold Standard	471
	International Monetary Cooperation	

Chapter XVIII. Action in the Passing of Time

1	Perspective in the Valuation of Time Periods	479
2	Time Preference as an Essential Requisite of Action	483
	Observations on the Evolution of the Time-Preference Theory	
3	Capital Goods	490
4	Period of Production, Waiting Time, and Period of Provision	493
	Prolongation of the Period of Provision Beyond the Expected Duration of the Actor's Life	
	Some Applications of the Time-Preference Theory	
5	The Convertibility of Capital Goods	503
6	The Influence of the Past Upon Action	505
7	Accumulation, Maintenance and Consumption of Capital	514
8	The Mobility of the Investor	517
9	Money and Capital; Saving and Investment	520

Chapter XIX. Interest

1	The Phenomenon of Interest	524
2	Originary Interest	526
3	The Height of Interest Rates	532
4	Originary Interest in the Changing Economy	534
5	The Computation of Interest	536

Chapter XX. Interest, Credit Expansion and the Trade Cycle

1	The Problems	538
2	The Entrepreneurial Component in the Gross Market Rate of Interest	539
3	The Price Premium as a Component of the Gross Market Rate of Interest	541
4	The Loan Market	545
5	The Effects of Changes in the Money Relation Upon Originary Interest	548
6	The Gross Market Rate of Interest as Affected by Inflation and Credit Expansion	550
	The Alleged Absence of Depressions Under Totalitarian Management	
7	The Gross Market Rate of Interest as Affected by Deflation and Credit Contraction	566
	The Difference Between Credit Expansion and Simple Inflation	
8	The Monetary Circulation Credit Theory of the Trade Cycle	571
9	The Market Economy as Affected by the Recurrence of the Trade Cycle	575
	The Role Played by Unemployed Factors of Production in the First Stages of a Boom	
	The Fallacies of the Nonmonetary Explanations of the Trade Cycle	

Chapter XXI. Work and Wages

1	Introversive Labor and Extroversive Labor	587
2	Joy and Tedium of Labor	588
3	Wages	592
4	Catalactic Unemployment	598
5	Gross Wage Rates and Net Wage Rates	600

6	Wages and Subsistence	602
	A Comparison Between the Historical Explanation of Wage Rates and the Regression Theorem	
7	The Supply of Labor as Affected by the Disutility of Labor	611
	Remarks About the Popular Interpretation of the “Industrial Revolution”	
8	Wage Rates as Affected by the Vicissitudes of the Market	624
9	The Labor Market	625
	The Work of Animals and of Slaves	

Chapter XXII. The Nonhuman Original Factors of Production

1	General Observations Concerning the Theory of Rent	635
2	The Time Factor in Land Utilization	637
3	The Submarginal Land	640
4	The Land as Standing Room	642
5	The Prices of Land	643
	The Myth of the Soil	

Chapter XXIII. The Data of the Market

1	The Theory and the Data	646
2	The Role of Power	647
3	The Historical Role of War and Conquest	649
4	Real Man as a Datum	651
5	The Period of Adjustment	652
6	The Limits of Property Rights and the Problems of External Costs and External Economies	654
	The External Economies of Intellectual Creation	
	Privileges and Quasi-privileges	

Chapter XXIV. Harmony and Conflict of Interests

1	The Ultimate Source of Profit and Loss on the Market	664
2	The Limitation of Offspring	667
3	The Harmony of the “Rightly Understood” Interests	673
4	Private Property	682
5	The Conflicts of Our Age	684
